A horizontal bar chart with 20 categories. Each category is represented by a vertical bar. The height of each bar indicates the frequency of data points in that category. The data points are represented by small circles placed along the bars. The distribution is roughly bell-shaped, peaking in the middle categories.

A horizontal bar chart showing the distribution of 1000 data points across 20 categories. The categories are represented by circles, and the bars show the frequency of each category. The distribution is roughly bell-shaped, peaking around the 10th category.

The chart displays the percentage of respondents for each gender across various age groups. The chart is divided into two main sections: 'Male' (left) and 'Female' (right). Each section contains a series of bars representing different age groups, with the percentage of respondents for each gender indicated by the length of the bar.

Increased flexibility with Nilfisk accessories & options

The SC UNO, SC DUO and SH SOLAR can be equipped with an electronic control board. This gives the possibility to use a wide range of factory-mounted options and equipment such as remote control, coin boxes, pressure relief... The use of options means that a standard machine is quickly and easily configured to become a customer-specific solution.
